MAS 90 and MAS 200 business management software offers a broad range of modules designed to meet the many needs of virtually any business. Choose to integrate as many modules as are beneficial to your business, and the resulting system can be truly more powerful than the individual components. Additionally, as your business continues to grow, you can have the confidence of knowing there are additional MAS 90 and MAS 200 modules that can provide you with the best solution to all of your business needs.

Regardless of the platform you choose, there is a MAS 90 or MAS 200 system that can meet your requirements. Windows 98/NT/2000/XP, and SQL versions are available. Functional on both the traditional local area network (LAN) and single-user environments, as well as wide area network (WAN) environments. The product line allows the flexibility to expand your system to accommodate greater numbers of users as your company grows, and provides more rapid transaction processing in the Windows environment.

MAS 200 is ideal for multi-site businesses and requires no additional remote access software. Designed to deliver industry-leading "benchmarked" performance for fast, reliable data throughput. Optimized for TCP/IP, this dynamic solution is Internet and intranet compatible and the thin client architecture provides the fast, reliable network connections you need.

CORE ACCOUNTING

At the heart of every MAS 90 and MAS 200 system are five core accounting modules — General Ledger, Accounts Receivable, Accounts Payable, Bank Reconciliation and Asset Accounting Powered by FAS. No other accounting software combines the depth, functionality and ease of use to the degree of the MAS 90 and MAS 200 family of products. Used by themselves, these five core modules provide an accounting foundation for your business that will maximize your productivity. When seamlessly integrated with any of the solutions below, MAS 90 and MAS 200 become even more powerful — providing solutions for nearly any business management need.

DISTRIBUTION

The MAS 90 and MAS 200 distribution solution gives you the power to cut costs, build profits, and improve customer service and loyalty. The distribution modules include: Inventory Management, Sales Order, Purchase Order, Return Merchandise Authorization, Bar Code, Credit Card Processing and StarShip. Among the long list of functions you can perform with the distribution solution is the ability to track inventory at multiple locations and maintain detailed sales history for each customer, product, and product line. StarShip automates the shipping process by providing links to major shipping carriers.

GLOBAL E-COMMERCE

Best is committed to providing you with ongoing software improvements as technology and business requirements evolve. That's why it comes as no great surprise that we're at the forefront of the rapidly expanding world of e-commerce. The e-Business Manager module for MAS 90 and MAS 200 provides an affordable, out-of-the-box solution that can quickly and effectively bring your company into the online arena. The unique structure of this module allows additional functionality to be integrated by plugging in applets. The .order applet allows customers to securely order online. The .inquiry applet gives your

customers instant access to their account status online. And the .store applet allows anonymous, new customers to browse products and securely place orders online.

TIME AND PROJECT MANAGEMENT

MAS 90 and MAS 200 link and integrate with a series of modules that can lead your company to increased efficiency and profitability. For instance, if you bill your customers for time, Timekeeper will provide you with an accurate, streamlined method of capturing and posting time to other modules such as Payroll or Accounts Receivable. Plus, by adding Abra HR and Payroll to the core modules, you'll have a complete solution for tracking your most vital asset: your employees. No matter which time and project management module you choose, you can rest assured that it will help improve your company's productivity and profitability.

MANUFACTURING

The MAS 90 and MAS 200 manufacturing modules provide detailed and accurate tracking and reporting throughout the entire manufacturing process — from the vendor's site to the shop floor and on to completion. The manufacturing solution offers a series of features that will help maximize efficiency throughout all stages. This includes the ability to create multi-level bills and produce accurate informative reports detailing bill structures. And, when goods are finished, they are instantly posted to Inventory Management or Sales Order for seamless integration.

BUSINESS INTELLIGENCE/ INTEGRATION TOOLS

Designed to increase productivity and enhance functionality, these customizable report writers and integration tools work seamlessly with MAS 90 and MAS 200 to create an all-encompassing information management system for your business. Our customers rave about the additional functionality they get by using Business Insights and Business Alerts. Business Insights, designed specifically for high-level managers such as CEOs, CFOs and sales

directors, enables you to view financial information in an attractive graphical format from your own customized homepage. It's a timesaving effective way to review and analyze your vital company information. Business Alerts is another way to keep your company, customers and vendors "in the know." This tool can be set to send you an e-mail when a predefined condition is met. For instance, if inventory drops below a certain point, you'll be notified with an instant message. These business tools are just one of the reasons why MAS 90 and MAS 200 are recommended by more CPAs than any other midrange accounting solution.

REMOTE SOLUTIONS

One of the most important trends in the software and technology industries is handheld and wireless computing. These capabilities have tremendous potential for improved productivity among remote staff — from field sales teams and globetrotting executives to warehouse personnel and onsite consultants. Best has effectively integrated MAS 90 and MAS 200 with Palm OS operated handhelds. Our customers have found this especially useful for recording time on site with the Timekeeper Remote module and improving customer service with the Remote Salesperson module. Both of these handheld modules are innovative tools that can help you provide more timely service and increase profitability.

FRONT OFFICE SOLUTIONS

By linking MAS 90 or MAS 200 to a Customer Relationship Management (CRM) solution, your company can make significant strides in sales performance and customer service. Working independently, CRM applications (such as SalesLogix and ACT! 2000) increase efficiency in customer-centric processes, including tracking and communicating with customers and prospective customers. Linking and synchronizing a CRM solution to your Best system allows you to provide superior customer service because all the necessary information relevant to a customer can readily be accessed by your sales force.
