

We leveraged 15 years of business software development experience to create MAS 90 — a graphical accounting and business management software that can give you increased productivity and improved business processes. MAS 90 is easy to learn and use, offers broad accounting functionality and integrates readily with other Windows applications such as Microsoft Word and Excel. Windows users will recognize the MAS 90 Launcher's Explorer-like interface, which allows them to locate any accounting task quickly and easily. Additionally, MAS 90 offers world-class financial and management reporting tools, superb customization capabilities and scalability for growing businesses.

### Minimum Recommended System Configuration for MAS 90

SYSTEM			
Single-User/Client Workstation	Processor	Memory	Add MB per user
Windows 98	Pentium 233 MHz <sup>1</sup>	32 MB	
Support for Windows 95 discontinued as of June 30, 2002	or higher	(64 MB or more recommended)	
Windows Me	Pentium II 300 MHz	64 MB	
	or higher (400 MHz recommended)	(128 MB or more recommended)	
Windows 2000 Professional <sup>2</sup>	Pentium II 300 MHz <sup>1</sup>	64 MB	
	or higher	(128 MB or more recommended)	
Windows NT Workstation 4.0 <sup>3</sup>	Pentium 233 MHz <sup>1</sup>	64 MB	
	or higher	(128 MB or more recommended)	
Windows XP Home and Professional Editions	Pentium III 550 MHz <sup>1</sup>	256 MB	
	or higher		
Windows 2000 Terminal Server Citrix MetaFrame, or Citrix MetaFrame XP	As required by Terminal Services or Citrix	32 MB per concurrent user recommended in addition to RAM required by Terminal Services/Citrix	
SERVER			
NetWare 5.0 <sup>5</sup> , 5.1 <sup>6</sup> , 6.0 <sup>7</sup>	Pentium 200 MHz <sup>1</sup>	64 MB (2-5 users)	2-3 MB per user (over 5 users)
	or higher		
Windows 2000 Server <sup>2</sup> and Advanced Server	Pentium III 300 MHz <sup>1</sup>	128 MB (2-5 users)	4-6 MB per user (over 5 users)
	or higher	(192 MB or more recommended)	
Windows 2000 <sup>3</sup> Professional Peer-to-Peer	Pentium II 300 or higher	64 MB (2-5 users)	4-6 MB per user (over 5 users)
		128 MB recommended	
Windows NT Server 4.0 <sup>3</sup>	Pentium 200 MHz <sup>1</sup>	64 MB (2-5 users)	4-6 MB per user (over 5 users)
	or higher	(128 MB or more recommended)	
Windows XP Home and Professional Editions (Peer-to-Peer)	Pentium III 550 MHz	256 MB (2-5 users)	4-6 MB per user
	or higher		5 users maximum
Windows NT Workstation 4.0 (Peer-to-Peer)	Pentium 233 MHz <sup>1</sup>	64 MB (2-5 users)	4-6 MB per user
	or higher	(128 MB or more recommended)	5 users maximum
Windows 98 (Peer-to-Peer)	Pentium 233 MHz <sup>1</sup>	64 MB (2-5 users)	4-6 MB per user
	or higher	(128 MB or more recommended)	5 users maximum

<sup>1</sup>Only Intel Pentium class or better processors are supported with MAS 90.

<sup>4</sup>Support Pack 9 or higher

<sup>2</sup>Service Pack 1 or better (Service Pack 2 recommended)

<sup>5</sup>Support Pack 4 or higher

<sup>3</sup>Service Pack 4 or better (Service Pack 6A recommended)

<sup>6</sup>Support Pack 2 recommended

<sup>7</sup>Support Pack 1 recommended

**Note:** A CD-ROM drive is required, together with a tape backup drive. Our memory recommendation is higher for NT, Windows 2000 and Windows Me servers and clients because the operating system requires more memory (prior to MAS 90 considerations) than NetWare and Windows 98. These configurations have been thoroughly tested on systems running MAS 90 alone. We cannot guarantee acceptable performance on or support for lesser configurations. You will require a more powerful configuration if you intend to run MAS 90 plus other server

applications at the same time, since multitasking could adversely affect your MAS 90 performance. **These recommended hardware requirements are subject to change. Prior to installing MAS 90, please review the most current Supported Platform Matrix. It is also important to view the Hot Pre-Installation Issues. Both can be found in Best Online Support and Services (BOSS) at the Best Software Web site (www.bestsoftware.com)**
